

# Week 8: Cherry Picking and Reflog

by Jonathan Miedel and Alvin Wang

# Last Week in Git Stuco

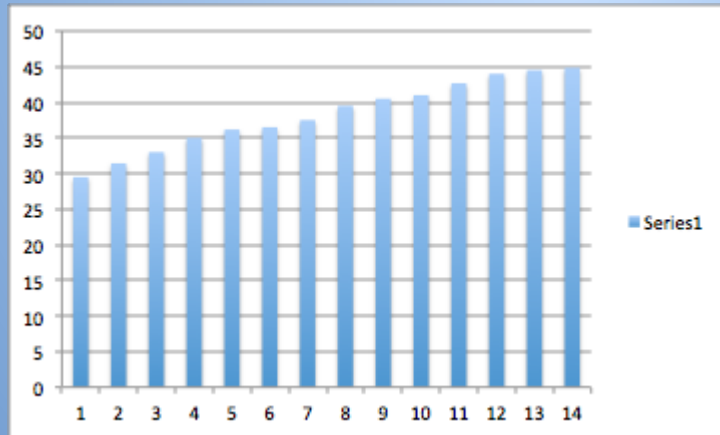

- We had a midterm

# Midterm

# Exam Grade Distribution

Average = 38.29357143

Standard Deviation = 4.948983745

# HW 4

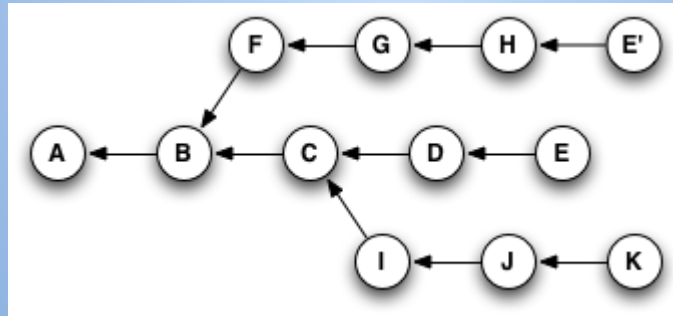

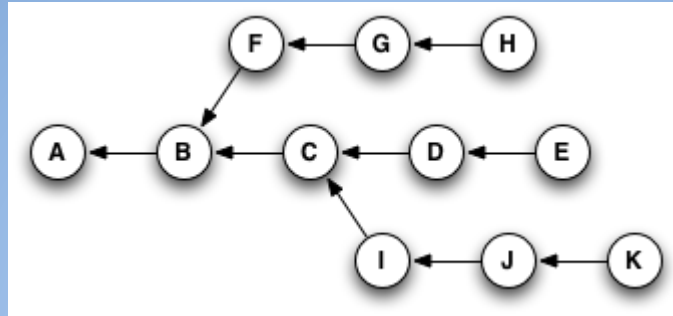

If you've already done it, +4 on HW

If not, finish it by 11:59PM today

# Rebase Review

# git cherry-pick

- `git cherry-pick <commit>`
- Like a mini rebase
- It applies the changes of one commit to your location
- Can be used to select a single bug-fix

# git reflog

- The reflog keeps track of updates to branches
- Allows us to reconnect dangling branches

# What should we cover?

- Hashing
- Hooks
- Bisect
- Filter-branch
- heroku
- github pages
